Basis of Presentation

The following Management's Discussion and Analysis ("MD&A") provides an overview of the operations of Organto Foods Inc. for the three months ended March 31, 2017. This report should be read in conjunction with the Company's audited consolidated financial statements and related notes for the year ended December 31, 2016 and the accompanying unaudited condensed interim consolidated financial statements for the interim period ended March 31, 2017, both of which were prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB").

Except where the context otherwise requires, all references in this MD&A to the "Company", "we", "us", "our" and "Organto" or similar words and phrases relate to Organto Foods Inc. and its subsidiaries, taken together.

All currency amounts are expressed in Canadian dollars unless noted otherwise. In addition, "this quarter" or "current quarter" refers to the three month period ended March 31, 2017.

This MD&A is dated May 30, 2017.

Forward-Looking Statements

This document contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to as "forward-looking statements"). Often, but not always, forward-looking statements can be identified by the use of words such as "plans," "expects" or "does not expect," "is expected," "planned," "budget," "scheduled," "estimates," "continues," "forecasts," "projects," "predicts," "intends," "anticipates" or "does not anticipate," or "believes," or variations of such words and phrases, or statements that certain actions, events or results "may," "could," "would," "should," "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any of our future results, performance or achievements expressed or implied by the forward-looking statements; consequently, undue reliance should not be placed on forward-looking statements.

Forward-looking statements are based on a number of assumptions that may prove to be incorrect, including, but not limited to, assumptions about our ability to carry out our plans and objectives; the ability to meet import and export requirements; general business and economic conditions; the timing of the receipt of any required approvals for operations; the availability of equity and other financing on reasonable terms; energy prices; our ability to procure required volumes of organic produce from both our own operations and strategic third party suppliers; our ability to procure equipment and operating supplies in sufficient quantities and on a timely basis; our ability to attract and retain skilled labour and staff; our ability to open up and sell through retail chains and other channels; operate in The Netherlands, Europe, North America and elsewhere; the impact of changes in the Canadian/US dollar and other foreign exchange rates on costs and results; transportation and logistics costs; market competition; and ongoing relations with our employees and with our business partners.

We caution you that the foregoing list of important factors and assumptions is not exhaustive. Whether actual results and developments will agree with our expectations and predictions is subject to many risks and uncertainties. Accordingly, there are or will be important factors that could cause our actual results to differ materially from our expectations and predictions. We believe these factors include, but are not limited to, the following:

- we have a limited operating history and may incur further losses until our operating platform achieves scale;
- there is risk in our ability to continue as a going concern due to losses incurred as we build our operating platform, risk in our negative working capital position and our accumulated deficit, all of which could impact our ability to continue operations;
- we may not be able to secure financing required to meet future capital needs to continue operations;
- additional financing may dilute common shareholders or place restrictions on our operations;
- we operate in a competitive global industry and the actions of competitors could impact revenues and profitability;
- we must attract and retain key personnel to achieve our business objectives;

- our customers are generally not obligated to continue to purchase products from us;
- if we do not manage our supply chain effectively, our operating results may be adversely affected;
- our international operations expose us to risks inherent with the countries where we are doing business;
- our business is subject to numerous environmental and food safety regulations and policies;
- our stock price may be volatile, which may impact returns to our shareholders;
- our common shares are thinly traded and our shareholders may be unable to sell at or near ask prices, or at all;
- we do not anticipate paying any cash dividends to our common shareholders and as a result shareholders may only realize a return when their shares are sold; and
- our business is subject to changing regulations related to corporate governance and public disclosure that may increase both our costs and risk of non-compliance.

Consequently all forward-looking statements made herein are qualified by these cautionary statements and there can be no assurance that our actual results or the developments we anticipate will be realized. The foregoing factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements and the detailed risks and uncertainties that are included in this report.

History and Legal Structure

History

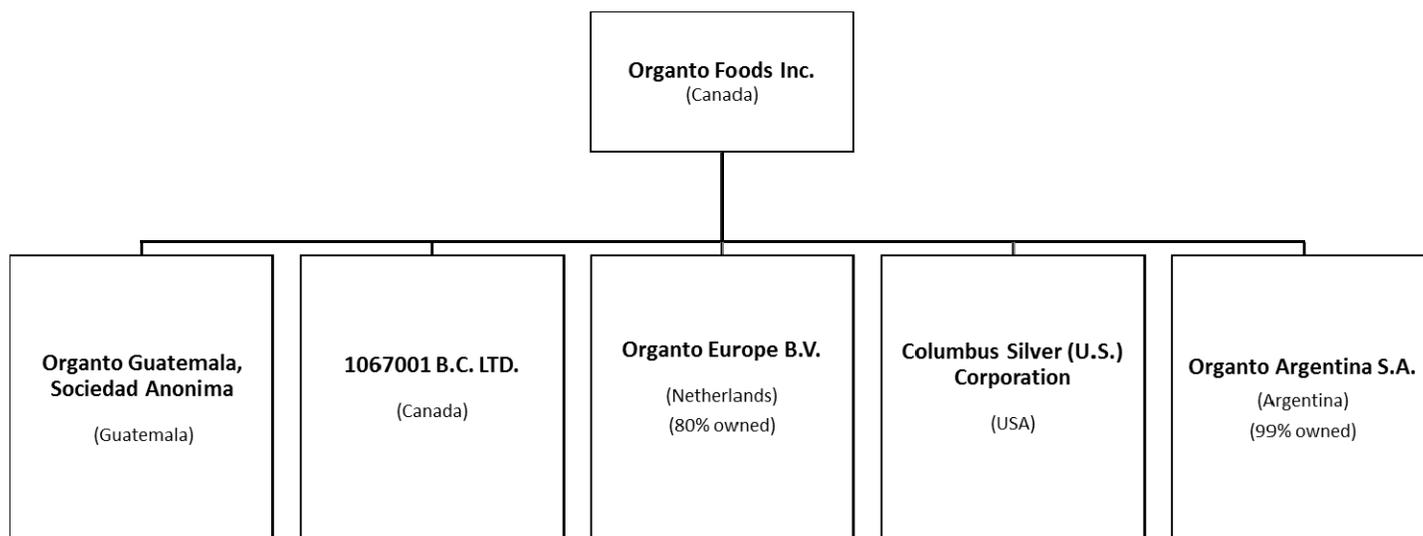

In March 2014 Agricola Nuova Terra S.A. (“Agricola”), a privately owned business, commenced operations to build out a global year round organic supply platform focused on the production and distribution of value-added branded organic vegetables.

On November 30, 2015, Agricola completed a reverse takeover (the “RTO”) of Columbus Exploration Corporation (“Columbus Exploration”). Columbus Exploration was incorporated on May 18, 2007 under the laws of the Province of British Columbia, Canada. Upon completion of the RTO, Columbus Exploration changed its name to Organto Foods Inc., and Agricola became a wholly-owned subsidiary of Organto Foods Inc. On March 21, 2016, Agricola changed its name to Organto Guatemala, Sociedad Anonima (“Organto Guatemala”)

The name change to Organto Foods Inc. was completed to better reflect our focus on growing, processing, packaging, distribution and branding vertically integrated year round organic foods along with our commitment to sustainable and socially conscious business practices. Currently we have growing and processing operations in Guatemala and growing operations in Argentina with efforts focused on expanding into Africa, Mexico, Peru and other geographies via strategic relationships as our platform is built out. Our head office is in Vancouver, British Columbia and we also have offices in Miami, Florida and in the Netherlands. Further details regarding our operations are provided later in this report under the heading Operations

Legal Structure

We have five subsidiaries in the jurisdictions listed below. All subsidiaries are wholly owned by Organto Foods Inc. unless noted otherwise.

Our head office is located at 1090 Hamilton Street, Vancouver, British Columbia, Canada.

Our fiscal year end is December 31st.

Our common shares are listed for trading on the TSX Venture Exchange (“TSXV”) under the trading symbol “OGO” and are quoted on the OTC Markets under the symbol “OGOFF”.

We have authorized capital of an unlimited number of common shares without par value. We have the following capital structure as at the date of this MD&A and March 31, 2017:

	May 30, 2017	March 31, 2017
Common shares issued and outstanding	77,066,187	76,816,187
Share purchase options outstanding (\$0.065-\$0.20)	2,420,000	2,420,000
Warrants (\$0.30-\$0.35)	445,475	445,475

Strategy

Our mission is “to be a leading vertically integrated organic value-added vegetable brand serving a growing socially responsible and health conscious consumer around the globe”.

We employ a business model that is integrated from the “table to the field”. Driven by consumer demand for healthy and organic food products, we have built and continue to build out a platform to deliver value-added branded products to meet these needs via an integrated model with extensive logistics, processing and growing capabilities, providing complete traceability from the table back to the field. Our model is rooted in our commitment to sustainable business practices focused on environmental responsibility and our commitment to the communities where we operate, our people and our shareholders.

Our focused strategic blueprint is centered on three key strategic pillars: *Supply, Brand and Infrastructure*.

- *Supply* – development of year round vertically integrated organic harvest and supply chain capabilities;
- *Brand* – building the Organto brand as a leading brand in organic value-added vegetables with leading retailers; and
- *Infrastructure* – build-out of our resource base to finance and support business growth.

We believe that the demand for healthy and organic foods will continue to grow for many years and supply availability will be key to this growth being realized. According to the US Organic Trade Association sales of organic products grew 10.9% in 2015 to over US\$43 billion, much ahead of the growth in sales of conventional products. Furthermore, over half of all households in the US have purchased organic produce and the fresh produce segment is the fastest growing within the organic segment. And this is not just a US phenomenon. According to an ABN AMRO report dated June 23, 2016, “by 2020 it is expected that global organic food consumption will reach US \$160 billion, to reach the expected growth there must be sufficient supply”.

It is our belief in these growing markets and consumer trends, combined with our ability to build an efficient year round branded organic supply platform that underlies our strategic focus and our mission to be a leading vertically integrated organic value-added vegetable brand serving a growing socially responsible and health conscious consumer around the globe.

Business Developments in 2017

On May 16, 2017, we issued 250,000 common shares to a supplier to settle amounts owing of \$62,500.

On May 15, 2017, we announced the signing of a five year exclusive supply agreement with GB Organic SAC (“GB Organic”), for the provision of specified volumes of organic snow peas and organic sugar snaps from GB Organic’s organic growing and processing operations located in the Andean Highlands of Peru.

On May 11, 2017, we announced our intention to complete a non-brokered private placement of 23,000,000 units at a price of \$0.15 per unit for gross proceeds of up to \$3,450,000. Each unit will consist of one common share and one warrant exercisable to purchase one additional common share at a price of \$0.25 for a period of 24 months after the closing date. The exercise date of the warrants will be subject to acceleration in the event that the volume-weighted average closing price of our common shares on the TSXV, or such other stock exchange on which our common shares are primarily traded from time to time, is greater than or equal to \$0.35 per share for a period of 10 consecutive trading days (an “Acceleration Event”) and such Acceleration Event occurs any time after the expiration of a four month hold period. Subject to the approval of the TSXV, we may pay to eligible finders cash finders’ fees equal to 8% of the gross proceeds raised and issue finders’ warrants equal to 8% of the number of units issued to applicable subscribers under the private placement. Each finder’s warrant will be exercisable into one Organto common shares at a price of \$0.15 for a period of 24 months from the closing date.

We received new bridge loans totalling \$268,540 (US\$200,000) in April 2017. The loans are unsecured, bear interest at a rate of 8% per annum and have a one year repayment term, subject to the option of the lenders to demand early repayment any time after Organto has announced the completion of an equity financing for aggregate proceeds of at least \$1,342,700 (US\$1,000,000). An aggregate of 1,000,000 non-transferable warrants will be issued to the lenders, exercisable for a term of 1 year from the date of the loan agreements, at \$0.20 per share. The new bridge loan agreements are subject to the approval of the TSXV. In connection with the new bridge loans, terms of the bridge loans received September 23, 2016 were amended to extend the term and interest rate to align with the new bridge loans, and 300,000 warrants initially issued will be cancelled and will be replaced with the 1,000,000 non-transferable warrants detailed above.

On April 20, 2017, we announced that we commenced retail sales of our organic green beans into the Ahold Delhaize Group, the 10th largest supermarket in the world and leading retailer in Belgium. Our products will first be added to the Delhaize chain in Belgium.

On April 19, 2017, we announced key leadership changes. Effective May 1, 2017 Arnoud Maas has been appointed Chief Executive Officer, succeeding Peter Gianulis who will transition into the role of Executive Vice President, Corporate Development and continue as a Director of the Board. In addition, Steve Bromley has been appointed as Strategic Advisor to the CEO and Board of Directors, focused on strategic development, business execution, risk management and governance matters. The Board of Directors intends to nominate Mr. Maas and Mr. Bromley to Organto’s Board of Directors at the next Annual General Meeting of Shareholders.

Mr. Maas has a long history in the consumer goods sector, particularly in the European and Asian food divisions of the former Sara Lee Corporation, which had operations in more than 40 countries and sold its product in over 180 nations worldwide. In the last three years, he has worked closely with the CEO and Board of Vroegop, a leading vertically integrated organic food company based in the Netherlands, where he assisted in strategically opening new distribution channels and market opportunities. Early in his career, Mr. Maas was a partner at Accenture, Kurt Salmon, as well as Capgemini Consulting, specializing in the consumer goods sector. He later held senior executive positions in retail, including as CEO of a leading chain of bookstores, and ultimately in the food sector, where he gained essential multi-jurisdictional management experience and extensive industry contacts. Mr. Maas holds a business degree from Sheffield University in the UK and a Masters in Economics from Keio University in Tokyo.

Mr. Bromley brings over 30 years of food industry experience to Organto, having served as CEO and a Director of SunOpta Inc. from 2007-2015. SunOpta is a global leader in non-GMO, organic and specialty foods with revenues in excess of \$1 billion, substantial manufacturing and integrated supply operations, and a diverse global customer base. Mr. Bromley joined SunOpta in 2001 as CFO and served in that role until 2004 when he was appointed President and COO, through to his appointment as CEO. Prior to joining SunOpta, Mr. Bromley spent 15 years in the dairy and meat industries and four years in public accounting. Mr. Bromley is a Chartered Professional Accountant and Certified General Accountant.

On March 14, 2017 we signed a settlement agreement with Arturo Bickford and Omega S.A., in which they assumed certain debts of the Company (including an outstanding debt for US\$185,000 as part of the RTO) and in which we agreed to pay Arturo Bickford US\$510,000 (US\$60,000 due on signing, US\$70,000 due in 8 weeks following signing, a US\$200,000 convertible note with no interest, convertible at \$0.20 per share, due in six months or earlier if we raise US\$1.0 million in equity, and a US\$180,000 term note with no interest, due in six months or earlier if we raise over US\$1.5 million in equity). We are currently restructuring this settlement.

On February 24, 2017, we announced commencement of sales to COOP Danmark, one of the largest food retailers in Europe.

On February 23, 2017, we announced a non-brokered convertible debenture private placement of \$2,035,000. The convertible debentures (the "Debentures") issued pursuant to the private placement are unsecured, have a term of three years, and bear interest of 8% annually, payable in arrears starting one year after the date of issuance of such Debentures. Holders may elect to convert the principal amount of their Debentures into common shares of Organto at a price of \$0.35 per share until the maturity date.

On January 26, 2017, we announced the appointment of Marcus Meurs as Chief Operating Officer, which followed the resignation of Mr. Andres Barresi from the role of Chief Operating Officer effective January 14, 2017. With this appointment, Mr. Meurs assumes responsibility for all operating aspects of Organto's "table to field" integrated organic produce business model including sourcing, procurement, processing, logistics, product development, sales and marketing.

On January 9, 2017, we announced the appointment of Marcus Meurs as President and Director of the Company. Mr. Meurs is a dynamic Dutch entrepreneur with more than 25 years of global experience in the conventional and organic foods industry. Prior to joining Organto he founded Pure Nature Organics and the Pure Nature brand, and grew the company to approximately US\$35 million in sales before selling the business. Mr. Meurs has deep experience in managing all facets of an international foods business including operations, processing, logistics, sales and pricing, strategic development and product development. Mr. Meurs has an MBA in International Management, a Bachelor of Business Administration and a Bachelor of Business Information Systems from the European University in Antwerp.

Operations

Branded Products Model

We have developed a branded go-to-market strategy under the Organto brand. Our ability to drive a differentiated branded products strategy is based on our continued development of year round supply capabilities which we believe are unique for these value added products and the first in many of the categories where we participate. In addition we believe we are the first fresh supplier in our categories with CO2 neutral logistics and 100% compostable packaging, and the first to globally market under a consistent brand to consumers. Our brand is initially being rolled out to specific European customers and will be followed by introduction in the North American market.

Supply Model

We have developed and are in the process of implementing a multi-location year round supply model sourcing and supplying organic green beans, organic sugar snaps, organic snow peas and other organic vegetables from a combination of company operated operations in Guatemala and Argentina and third party sourcing arrangements in Peru, Argentina, Mexico and various countries within Africa including Uganda and Egypt. We own a processing and packing operation in Guatemala and work with third parties for processing and packing in in all other geographic locations.

Products for the European market are shipped bulk from our supply sources and are subsequently inspected and packaged for consumer consumption in the Netherlands through a relationship with a strategic packing partner. Products for the USA market will either be pre-packaged at source due to the relative close proximity to the end customers or packaged closer to end users via strategic partners.

Further details on our supply locations are provided below.

Guatemala

In Guatemala we own and operate a state of the art processing and packing facility in Patzun, and grow organic value-added vegetable products from owned and leased farms strategically located throughout the country. The Patzun, Chimaltenango facility has USDA National Organic Program certification. Currently we have approximately 300 hectares of owned and leased farmland available to us and this could be further expanded to in excess of 500 hectares. We expect to be harvesting approximately 15 hectares per week of finished product at the end of the next three years, utilizing currently available farmland. Approximately 24 hectares are currently in production in Monjas, Department of Jalapa and we will continue to expand growing capabilities to meet future demand. All land that is in production has USDA, EU, Canadian and Japanese organic certifications.

We are currently directly operating our growing operations but may also sub-contract growing of certain products to growers and growing associations in and around Guatemala. All products grown by us or outsourced from local farmers are and will be transported to the packing plant in Patzun to be cleaned, sorted, graded and packed.

Current and future products include organic snow peas, organic sugar snaps, organic green beans (haricot verts), organic butter beans, organic edamame, organic specialty peppers, organic broccolini and other organic vegetables.

Argentina

In Argentina we have completed numerous commercial trials on farmland we have leased and operated. Based on these trials we intend to operate and expand our own growing operations on a seasonal basis in Mar del Plata. These will operate for certain seasons and be paired with supply from contracted third party growers to meet demand. Offsetting seasonal supply will be contracted with third party growers, initially in the Catamarca region, with initial production expected to be available in late 2017. All land that is in production has both USDA and EU organic certification.

Current and future products include organic snow peas, organic sugar snaps, organic asparagus and other organic vegetables.

Peru

In Peru we have an agreement in place with a strategic third party supplier which has approximately 144 hectares of organic farmland. Our agreement is for five years, with the supplier committing to deliver specified volumes of organic snow peas and organic sugar snaps to us during 2017 at a pre-established price. Quantities and pricing for subsequent years are to be determined on a year to year basis.

We expect to receive first shipments from Peru in the third quarter of 2017.

Africa

In Uganda we have a strategic agreement with Amfri to grow organic and Demeter certified organic products under our brand. Amfri operates a 600 hectare (1500 acre) Demeter certified Biodynamic farm using a biodynamic methodology that treats, using a holistic approach, soil fertility, plant life and livestock as ecologically interrelated tasks and is globally recognized as one of the most complete organic certifications internationally. We are also working to complete third party growing relationships in Egypt and are also assessing other growing regions on the continent.

We commenced operations in Uganda during the first quarter of 2017 and are now receiving product for sale in the European market. We also expect to further expand growing operations into Egypt via strategic third party growing relationships in the second half of 2017.

Products from African sources will include organic green beans, organic snow peas and organic sugar snaps.

Mexico

In Mexico we are developing relationships with third party growers in three distinct growing regions in the country, providing for seasonally diversified supply of certain crops.

Products are expected to include organic green beans, organic snow peas, organic sugar snaps, organic asparagus and other organic vegetables, to be supplied for both the European and North American markets.

Selling and Administration

Our head office is located in Vancouver, British Columbia and finance and administration services are provided by a related party. An agreement is in place with this third party through the end of 2017, at which time all services will have been transitioned to a stand-alone administrative platform in order to meet the growth needs of our business. We also operate from an administrative office in Miami, Florida and this office will be expanded as commercial activities in the USA ramp-up throughout 2017. In Europe we operate out of administrative offices located in the Netherlands. Resources are to be added to all these units as our business expands. In addition local administrative resources are located in select geographies where we source raw materials. Selling, General and Administrative costs are all projected to increase as the business grows, but become a lower percentage of sales as the business scales.

Financial Results

For the purposes of the information presented, the “Company” is defined as the consolidated entity.

Critical Accounting Estimates

The preparation of financial statements in accordance with IFRS is the responsibility of management and requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Our management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is risk of material adjustments to assets and liabilities in future accounting periods include estimates of useful lives of depreciated and amortized assets, the valuation of inventory which includes estimates with regards to the allocation of overhead and determining the net realizable value, assumptions used in determination of the fair value of share-based payments, the recoverability and measurement of deferred tax assets, and the allocation of the purchase price associated with the acquisition of a business.

The preparation of financial statements in accordance with IFRS requires us to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in preparing our financial statements include the assumption that we will continue as a going concern, classification of expenditures and the classification of financial instruments.

Changes in Accounting Policies and Standards

A number of new standards, and amendments to standards and interpretations, are not yet effective for the three months ended March 31, 2017, and have not been applied in preparing these consolidated financial statements. Those that may have a significant effect on our consolidated financial statements in the future are as follows:

(a) IFRS 9 – *Financial Instruments* (“IFRS 9”)

This new standard is a partial replacement of IAS 39 “Financial Instruments: Recognition and Measurement”. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018.

(b) IFRS 15 – *Revenue from Contracts with Customers* (“IFRS 15”)

IFRS 15 specifies how and when an IFRS reporter will recognise revenue as well as requiring such entities to provide users of financial statements with more informative, relevant disclosures. The standard supersedes IAS 18 'Revenue', IAS 11 'Construction Contracts' and a number of revenue-related interpretations. Application of the standard is mandatory for all IFRS reporters and it applies to nearly all contracts with customers: the main exceptions are leases, financial instruments and insurance contracts. IFRS 15 is effective for annual periods beginning on or after January 1, 2018.

(c) Other

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

Financial Performance

The following highlight's our financial performance for the three months ended March 31, 2017:

	Three months ended		%
	March 31, 2017 (\$)	March 31, 2016 (\$)	
Revenues	35,574	1,401,340	(97%)
Gross (loss) profit	(157,230)	96,980	(262%)
Net loss for the period	(978,560)	(646,448)	(51%)
Cash used in operating activities	(1,781,643)	(47,266)	(3,669%)
Loss per share	(0.01)	(0.01)	-

Review of Financial Results – Current Quarter

We incurred a net loss of \$978,560 during the current quarter, compared to \$646,448 during the same period in the prior year. The increase in the net loss for the quarter is discussed below.

Revenues for the three months ended March 31, 2017 were \$35,574 as compared to \$1,401,340 during the same period in the prior year. Revenues for the quarter represented the start of the commercial roll-out of our organic product offering late in the quarter after an extended period with limited revenue as we completed trials of our processes and attained organic certifications, all in support of the build out of our year round supply capabilities. Revenues from the prior year quarter were mainly from conventional produce. We expect revenues to ramp-up going forward as our supply increases from both our own growing and processing operations and strategic third party suppliers. Gains from recognition and remeasurement of biological assets arise from when

seeds are sown up until when they are harvested, with corresponding increases in fair value. Gross profit was impacted in the quarter by overheads associated with the build-out of these capabilities plus amortization costs related to our fixed assets.

Selling, general and administration expenses increased to \$399,397 this quarter, up from \$286,446 in the prior year. These increased costs are primarily attributable to increased monthly services fees to Columbus Gold, increased investor relations activities and additional administration expenses to support growth and expansion.

Management fees during the current quarter increased to \$260,052, compared to \$128,135 in the prior year, attributable to the addition of a strategic advisor to our team and compensation adjustments. The management fees are attributable to the CEO, COO and certain management and advisors of the Company.

Salaries and benefits decreased in the current quarter to \$109,425 from \$196,731 in the prior year. The decrease is the result of reduced staffing during our strategic realignment of operations in advance of commencing commercial production at end of the first quarter of 2017.

We incurred other losses of \$54,453 this quarter, compared to other income of \$3,189 during the comparative prior period. The loss in the current quarter is mainly attributable to settlement of certain commitments, reducing the overall amount of payments the company is required to make.

We have amounts due to Omega S.A. ("Omega"), short-term loans payable, and a convertible loans payable, all of which incur interest at various rates. Total interest expense recognized during the current quarter relating to these liabilities is \$87,572, compared to \$42,152 during the prior year comparative period.

Foreign exchange gains and losses arise from transactions incurred in currencies other than the functional currency of the Company and its subsidiaries. We incurred a foreign exchange gain of \$20,208 this quarter as compared to loss of \$93,153 during the prior year comparative period. The gain in the current year is attributable to the strengthening of the Canadian Dollar relative to the US Dollar, having a favorable impact on our US Dollar denominated liabilities.

We recorded a gain on embedded derivative financial liability of \$69,361 this quarter, as a result of the expiration of the conversion option on our convertible loan payable.

Liquidity and Capital Resources

At March 31, 2017, we had cash of \$201,663 and a working capital deficiency of \$4,774,238, compared to \$26,230 and \$4,072,903, respectively, at December 31, 2016.

Cash used in operating activities for the three months ended March 31, 2017 was \$1,781,643, compared to \$47,266, during the same period in the prior year. Cash used in operations consists of cash used to fund the loss for the period and the impact of non-cash items and changes in non-cash working capital.

During the three months ended March 31, 2017, we invested \$13,387 in property, plant and equipment. During the comparative prior year quarter, we received net cash inflows from investing activities of \$6,394, consisting of \$27,448 received from the sale of our Clanton Hills property, partially offset by investments in property, plant and equipment of \$21,054.

During this quarter, we received \$2,035,000 as advances for convertible debentures to be issued, and repaid loans to Peter Gianulis in the amount of \$64,496 (see *Related Party Transactions*). During the same quarter in the prior year, we paid interest of \$13,487 and repaid short term loans of \$2,813.

At March 31, 2017, we had current liabilities of \$5,733,544, and no non-current liabilities.

We are reliant upon equity and/or debt financings to fund operations until such time as revenues are sufficient to sustain operations.

Financial instruments

The fair value of our financial instruments, financial statement classification and associated risks are presented in the table below:

Financial instrument	Basis of measurement	Associated risks	Fair value at March 31, 2017 (\$)
Cash	Fair value through profit or loss	Credit, currency and concentration	201,663
Receivables	Amortized cost	Credit, currency and concentration	179,216
Accounts payable	Amortized cost	Currency	(1,494,066)
Due to Omega S.A.	Amortized cost	Currency	(508,979)
Short-term loans payable	Amortized cost	Currency	(248,009)
Convertible loan payable	Amortized cost	Currency	(823,981)
Due to Columbus Gold	Amortized cost	n/a	(196,639)
Advances for convertible debenture	Amortized cost	n/a	(2,035,000)
			(4,925,795)

The fair value of our financial instruments including cash, receivables, accounts payable, Due to Omega S.A., short-term loans payable, amounts due to Columbus Gold and advances for a convertible debentures approximates their carrying value due to the immediate or short term maturity of these financial instruments.

IFRS 7, *Financial Instruments: Disclosure* establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

During the three months ended March 31, 2017, we recognized a gain \$69,361 in connection with our *Embedded derivative financial liability*, as a result of the expiry of the conversion option. We incurred aggregate interest expense of \$87,572, in connection with amounts Due to Omega S.A., short-term and convertible loans payable during the three months ended March 31, 2017, compared to \$42,152 for the three months March 31, 2016.

Our financial instruments are exposed to certain financial risks. The risk exposures and the impact on our financial instruments at March 31, 2017 are summarized below. The Board of Directors reviews with management the principal risks affecting the Company and the systems that have been put in place to manage these risks.

(a) Credit risk

Credit risk is the risk that the Company will incur a loss due to a customer or third party failing to discharge their obligation due to the Company.

The credit risk exposure on cash is limited to their carrying amounts at the date of the statement of financial position. Cash is held as cash deposits with creditworthy banks in Canada, Guatemala, Argentina and Europe. The risk is assessed as low.

The credit risk exposure on receivables is limited to their carrying amounts at the date of the statement of financial position. Trade receivables are mainly from one customer in Europe. The risk is assessed as high due to the limited number of customers. Other receivables are primarily comprised of GST and VAT credits with a low risk assessment.

(b) Liquidity risk

Liquidity risk arises from the Company's general and capital financing needs. We manage liquidity risk by attempting to maintain sufficient cash and cash equivalent balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short term obligations. As at March 31, 2017, we had a working capital deficiency of \$4,774,238 (December 31, 2016 – \$4,072,903). Liquidity risk is assessed as high.

To address the liquidity risk, on May 11, 2017, we announced our intention to complete a non-brokered private placement of 23,000,000 units at a price of \$0.15 per unit for gross proceeds of up to \$3,450,000. Each unit will consist of one common share and one warrant exercisable to purchase one additional common share at a price of \$0.25 for a period of 24 months after the closing date.

We received a bridge loan of \$265,980 (US\$200,000) in April 2017 to further address liquidity risk.

(c) Market risks – interest rate

We do not have debt that is subject to interest rate risks, as the debts have fixed rates.

Sensitivity Analysis

A 1% change in interest rates does not have a material effect on our profit or loss and equity.

As our functional currency is the Canadian Dollar, where foreign currency transactions such as the US Dollar, European Euro, and Guatemalan Quetzal are converted into Canadian Dollars, changes in exchange rates between these currencies may have an effect on our profit or loss and equity. A +/- 10% change in the exchange rate between those currencies and the Canadian Dollar can affect net income by approximately \$20,000.

Capital Management

When managing capital our objective is to ensure an optimal capital structure is maintained to reduce overall cost of capital and allowing flexibility to respond to changes in working capital requirements.

In the management of capital, we include the components of shareholders' equity as well as cash and receivables.

We manage the capital structure and make adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, we may attempt to issue new shares, acquire or dispose of assets or adjust the amount of cash and investments.

In order to facilitate the management of our capital requirements, we monitor working capital and cash flows regularly. There have been no changes to our capital management policies and procedures since the end of the most recent fiscal year.

Related Party Transactions

We have a Services Agreement with Columbus Gold, whereby Columbus Gold provides administration and management services for a fixed monthly fee. The Services Agreement is effective until December 31, 2017. Columbus Gold has certain directors and officers in common with the Company.

The following related party transactions were in the normal course of operations:

	Three months ended	
	March 31, 2017 (\$)	March 31, 2016 (\$)
Management fees paid or accrued to Fresh Organics LLC, a Company owned by Marcus Meurs, the COO of the Company	74,777	24,000
Management fees paid or accrued to Peter Gianulis, Executive Vice President, Corporate Development of the Company	47,597	36,000
Management fees paid or accrued to Brandal B.V., a company owned by Riens van der Wal, a director of the Company's subsidiary	84,642	68,135
Management fees paid or accrued to Andres Barresi, former COO of the Company	7,293	-
Administration fees paid or accrued to Columbus Gold	76,200	35,000
Directors fees paid or accrued	18,000	18,000
	308,509	181,135

The following summarizes advances, amounts that remain payable or accrued to each related party:

	March 31, 2017 (\$)	December 31, 2016 (\$)
Due to Omega	508,979	500,419
Due to Columbus Gold	196,639	138,683
Loan payable to CrediPresto, a corporation of which Javier Reyes, a director of the Company, is a principal	122,050	118,439
Management fees payable to Andres Barresi	104,650	98,294
Management fees and expense reimbursements payable to Peter Gianulis	60,922	240,857
Loan payable to Peter Gianulis	-	64,496
Management fees payable and (advances) to Fresh Organics	(88,751)	12,775
Directors fees included in accrued liabilities	70,000	78,000
	974,489	1,251,963

Commitments

At March 31, 2017, we have the following commitments:

	Within 1 year (\$)	Between 1 and 5 years (\$)	After 5 years (\$)	Total (\$)
Lease payments for land use in Guatemala	148,171	538,211	491,880	1,178,262
Management fees to Arnoud Maas	292,578	26,598	-	319,176
Management fees to Fresh Organics LLC	269,305	261,827	-	531,132
Management fees to Peter Gianulis	193,349	370,585	-	563,934
Services agreement with Columbus Gold	225,000	-	-	225,000
	1,128,403	1,197,221	491,880	2,817,504

On May 3, 2017, we signed a five year exclusive supply agreement with GB Organic, for the provision of specified volumes of organic snow peas and organic sugar snaps from GB Organic's organic growing and processing operations located in the Andean Highlands of Peru. The commitments in connection with this agreement is as follows: within 1 year - \$3,840,086; between 1 and 5 years - \$15,360,345, for a total of \$19,200,431.

Risks and Uncertainties

Risk factors

Our business, operations and financial condition are subject to various risks and uncertainties. Prior to making an investment decision investors should consider the risks and uncertainties set out below and those described elsewhere in this document, which are in addition to the usual risks associated with an investment in a business engaged in the global production and distribution of organic produce. We believe the risks set out below to be the most significant to potential investors, but do not represent all of the risks associated with an investment in securities of our Company. If any of the identified risks materialize or other additional risks and uncertainties of which we are currently unaware materialize, our assets, liabilities, financial condition, results of operations (including future results of operations), business and business prospects are likely to be materially and adversely affected. These risk factors should be read in conjunction with other information in this report and in other documents that we file from time to time.

Risks Related to Our Business

We have a limited operating history and may incur further losses until our operating platform achieves scale.

Agricola began carrying on business in 2014 and since that time we have built out our operating platform and generated approximately \$4 million in revenues and operating losses of approximately \$7 million. We are subject to many of the risks common to early-stage enterprises, including costs associated with building out an operating platform prior to volumes coming to scale, undercapitalization, cash shortages, and limitations with respect to personnel, financial, and other resources. There is no assurance that we will be successful in establishing a customer base, that consumers will purchase our products, or that we will begin generating revenues sufficient to cover our operating costs. Our ability to achieve a return on shareholders' investment and the likelihood of its success must be considered in light of the company's early stage of operations.

There is risk in our ability to continue as a going concern due to losses incurred as we build out our operating platform, risk in our negative working capital position and our accumulated deficit, all of which could impact our ability to continue operations.

Our independent auditors have added an explanatory paragraph to their audit opinion issued in connection with our financial statements for the years ended December 31, 2016 and 2015 with respect to our ability to continue as a going concern. As discussed in Note 1 to our financial statements for the current quarter, we have generated operating losses since inception, cash resources are currently insufficient to meet planned business objectives, and thus additional financing will be required to realize the carrying value of our assets and continue operations, which together raises doubt about our ability to continue as a going concern.

We may not be able to secure financing required to meet future capital needs to continue operations.

We will require additional capital to fulfill our contractual obligations and continue development of our product offerings and global operating platform, through either equity or debt financing. Due to business specific or general economic conditions, we may be unable to secure debt or equity financing on terms acceptable to the Company, or at all, at the time when we need such funding. Our inability to raise additional funds on a timely basis would make it difficult to achieve our business objectives and would have a negative impact on our business, financial condition and results of operations.

Additional financing may dilute common shareholders or place restrictions on our operations.

If we raise funds by issuing additional equity or convertible debt securities, the ownership percentages of existing stockholders would be reduced, and the securities that we issue may have rights, preferences or privileges senior to those of the holders of our common stock or may be issued at a discount to the market price of our common stock which would result in dilution to our existing stockholders. If we raise additional funds by issuing debt, the Company may be subject to debt covenants, which could place limitations on our operations including our ability to declare and pay dividends.

We operate in a competitive global food industry and the actions of competitors could impact revenues and profitability.

The agricultural produce industry is intensely competitive in all of its phases. We compete with other companies, some of whom have greater financial resources, larger facilities, more capacity, higher staffing levels, greater economies of scale, pricing advantages, longer operating histories and more established market presences. We may have little or no control over some or all of these competitive factors. If we are unable to effectively respond to these competitive factors, or if the competition in our product markets results in price reductions or decreased demand for our products, our business, results of operations and financial condition may be materially impacted.

We are focusing our business on the production, processing, packing and distribution of value-added and branded organic produce grown in strategic geographies that will provide us with year round supply capabilities. As a result of changing consumer preferences and awareness, we believe there is increased demand for organic produce over conventional produce which we believe will be positive for us. We also expect to face additional competition from new entrants to the organic produce market. Our ability to remain competitive will depend to a great extent on our ability to grow our customer base, maintain competitive pricing levels, manage transportation and delivery logistics and effectively market our products to our customers. There can be no assurance that we will have sufficient resources to compete successfully with our current or future competitors in these areas, which could have a material adverse effect on our business plan and results of operations.

We must attract and retain key personnel to achieve our business objectives.

Our success will be largely dependent upon the performance of our management and key employees. We must compete with other companies both within and outside the food industry to recruit and retain competent employees and contract resources. If we cannot attract and maintain qualified resources to meet our business needs, this could have a material adverse effect on our business. In addition, the Company does not have any key man insurance policies and therefore there is a risk that the death or departure of any existing member of management or any key employee could also have a material adverse effect on the Company.

Our customers generally are not obligated to continue purchasing products from us.

Many of our customers buy from us under purchase orders, and we generally do not have long-term agreements with or commitments from these customers for the purchase of our products. We cannot provide assurance that our customers will maintain or increase their sales volumes or orders for the products supplied by us or that we will be able to maintain or add to our existing customer base. Decreases in our customers' sales volumes or orders for products supplied by us may have a material adverse effect on our business, financial condition or results of operations.

If we do not manage our supply chain effectively, our operating results may be adversely affected.

Our supply chain is complex and subject to a number of risks. We directly operate growing and processing operations but also rely on a number of third party suppliers for the growing, processing, packaging and distribution of certain of our products. Our inability to effectively manage our supply chain could cause our operating costs to rise and our margins to fall. In addition, potential adverse weather conditions and natural disasters add another layer of risk to our supply chain. We must continuously monitor our inventory and product mix against forecasted demand or risk having inadequate supplies to meet customer demand as well as having too

much inventory that could reach its expiration date. If we are unable to manage our supply chain efficiently and ensure that our products are available to meet customer demand, our operating costs could increase and our margins could fall.

Our international operations expose us to additional risks inherent with the countries where we are doing business.

We operate in various foreign jurisdictions around the world. These international operations expose us to risks inherent in doing business abroad including exposure to local economic conditions, foreign exchange rate fluctuations and currency controls, investment restrictions or requirements, export and import restrictions, compliance with anti-corruption and anti-bribery laws, compliance with export controls and economic sanctions laws, and unforeseen events such as natural disasters, terrorism or political and civil unrest. As we continue to expand our business globally, we may have difficulty anticipating and effectively managing these and other risks, thus materially impacting our business, financial condition and results of operations.

Our business is subject to numerous environmental and food safety regulations and policies.

Our operations are subject to environmental and food safety regulations and policies in the areas where we operate. Changes in any government laws or regulations applicable to our operations could increase our compliance costs, negatively affect our ability to sell certain products or otherwise adversely affect our results of operations. While we believe we are in compliance with all laws and regulations applicable to our operations, we cannot assure you that we have been, or will at all times be, in compliance with all environmental and food safety requirements, or that we will not incur material costs or liabilities in connection with these requirements. Our failure to comply with any laws, regulations or policies applicable to our business could lead to penalties, loss of our ability to sell certain of our products, possible product recalls and others, any of which could have a material impact on our business, financial condition and results of operations.

Risks Related to Ownership of Our Securities

Our stock price may be volatile, which may impact returns to our shareholders.

From time to time stock markets experience extreme price and volume fluctuations, which, when combined with general economic and political conditions, could adversely affect the market price for our securities. In addition, the trading price of our common stock may be volatile and could fluctuate widely in response to many factors, including the following, some of which are beyond our control:

- variations in our operating results;
- changes in expectations of our future financial performance, including financial estimates by securities analysts and investors;
- changes in operating and stock price performance of other companies in our industry;
- additions or departures of key personnel; and
- future sales of our common stock.

Our common shares are thinly traded and our shareholders may be unable to sell at or near ask prices, or at all.

We cannot predict the extent to which an active public market for trading our common stock will be sustained. Our shares have historically been thinly-traded meaning that the number of persons interested in purchasing our common shares at or near bid prices at a certain given time may be relatively small or non-existent.

This situation is attributable to a number of factors, including the fact that we are a smaller company in its development phase which is relatively unknown to stock analysts, stock brokers, institutional investors and others in the investment community who generate or influence sales volume. Even if we came to the attention of such persons, those persons may be reluctant to follow, purchase, or recommend the purchase of shares of an unproven company such as ours until such time as we become more seasoned and viable. As a consequence, there may be periods of several days or more when trading activity in our shares is minimal or non-existent, as compared to a seasoned issuer which has a large and steady volume of trading activity that will generally support continuous trades without an adverse effect on share price. We cannot be assured that a broader or more active public trading market for our common stock will develop or be sustained, or that current trading levels will be sustained.

We do not anticipate paying any cash dividends to our common shareholders and as a result shareholders may only realize a return when their shares are sold.

We presently do not anticipate that we will pay dividends on any of our common stock in the foreseeable future. If payment of dividends does occur at some point in the future, it would be contingent upon our revenues and earnings, if any, capital

requirements, and general financial condition. The payment of any common stock dividends will be at the discretion of our Board of Directors. We presently intend to retain all earnings to implement our business plan; accordingly, we do not anticipate the declaration of any dividends for common stock in the foreseeable future.

Our business is subject to changing regulations related to corporate governance and public disclosure that may increase both our costs and the risk of noncompliance.

Because our common stock is publicly traded, we are subject to certain rules and regulations of federal, provincial and financial market exchange entities charged with the protection of investors and the oversight of companies whose securities are publicly traded. These entities have issued requirements and regulations and continue to develop additional regulations and requirements in response to public concerns. Our efforts to comply with these regulations have resulted in, and are likely to continue resulting in, increasing general and administrative expenses. Because new and modified laws, regulations and standards are subject to varying interpretations in many cases due to their lack of specificity, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This evolution may result in continuing uncertainty regarding compliance matters and additional costs necessitated by ongoing revisions to our disclosure and governance practices.

Disclosure and Internal Controls

Disclosure controls and procedures have been established to provide reasonable assurance that material information relating to the Company is made known to management, particularly during the period in which annual filings are being prepared. Furthermore, internal controls over financial reporting have been established to ensure that the Company's assets are safeguarded and to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with IFRS.

The Company is an emerging markets issuer, and as such, is required by the TSXV to have sufficient internal controls over financial reporting. Effective for the three months ending March 31, 2017, we enhanced our disclosure controls and procedures through the implementation of the *Internal Control – Integrated Framework (2013 Framework)* ("COSO 2013") control framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

The accompanying notes are an integral part of these condensed interim consolidated financial statements.

1. Nature of operations and going concern

The Company was incorporated on May 18, 2007 under the laws of the Province of British Columbia, Canada. The Company's common shares are listed for trading on the TSX Venture Exchange ("TSXV") and are traded under the stock symbol "OGO". The Company's principal business activity is the sourcing, processing, packaging and distribution of organic and specialty food products with a focus on branded organic value added vegetables. The Company has growing and processing operations in Guatemala and Argentina, with office locations in Vancouver, British Columbia, Miami, Florida and the Netherlands.

These condensed interim consolidated financial statements have been prepared on a going concern basis which implies that the Company will continue realizing its assets and discharging its liabilities in the normal course of business for the foreseeable future. Should the going concern assumption not continue to be appropriate, further adjustments to carrying values of assets and liabilities may be required. The operations of the Company were primarily funded by the issue of share capital, short-term loans and convertible loans. At March 31, 2017, the Company had a working capital deficiency of \$4,774,238 (December 31, 2016 – \$4,072,903) and an accumulated deficit of \$7,198,955 (December 31, 2016 - \$6,328,684). Accordingly, the ability of the Company to realize the carrying value of its assets and continue operations as a going concern is dependent upon its ability to obtain additional financing as needed, continued financial support from related parties, and ultimately on generating future profitable operations. The factors described may cast significant doubt about the Company's ability to continue as a going concern.

The Company's head office and principal address is located at 1090 Hamilton Street, Vancouver, British Columbia, V6B 2R9, Canada.

2. Basis of presentation

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standards 34, *Interim Financial Reporting* ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). These condensed interim consolidated financial statements have been prepared using the same accounting policies and methods of computation as the most recent annual financial statements for the year ending December 31, 2016. Certain amounts in the prior period have been reclassified to conform to the presentation in the current period.

These condensed interim consolidated financial statements were approved by the Board of Directors and authorized for issue on May 30, 2017.

3. Receivables

	March 31, 2017 (\$)	December 31, 2016 (\$)
Trade receivables	473,732	444,626
Other receivables	143,691	53,237
	617,423	497,863
Allowance for doubtful amounts	(438,207)	(444,626)
	179,216	53,237

Organto Foods Inc.

Notes to the Condensed Interim Consolidated Financial Statements (Unaudited)

For the Three Months Ended March 31, 2017 and 2016

(Expressed in Canadian Dollars)

4. Inventories

	March 31, 2017 (\$)	December 31, 2016 (\$)
Packing material	178,733	186,587
Agricultural inputs	52,262	52,663
Biological assets	86,122	7,473
Finished goods	57,999	-
	375,116	246,723

A continuity of the Company's biological assets is presented in the table below:

	(\$)
Balance, January 1, 2015	-
Initial recognition and changes in fair value	7,473
Balance, December 31, 2016	7,473
Initial recognition and changes in fair value	135,024
Decrease due to harvest (16,941 kg of produce)	(56,375)
Balance, March 31, 2017	86,122

Biological assets are measured at fair value within level 3 of the fair value hierarchy.

At March 31, 2017	1,729,909	2,377,321	121,804	110,763	116,491	4,456,288

The Company's buildings are situated on land owned by a third party, which is subject to a lease agreement (note 15).

6. Advances for convertible debenture

On February 23, 2017 the Company entered into a non-brokered convertible debenture private placement of \$2,035,000 (received). The convertible debentures (the “Debentures”) have a term of three years, and bear interest of 8% annually, payable in arrears starting one year after the date of issuance of such Debentures. Holders may elect to convert the principal amount of their Debentures into common shares at a price of \$0.35 per share until the maturity date. Finders may be issued common shares as compensation pursuant to the private placement, equal to 6% of the total dollar amount of Debentures sold by any finder, divided by the 20 day volume weighted average price prior to the closing date of the financing.

The funds received in connection with the convertible debenture have been recorded as an advance until the debentures have been issued.

7. Due to Omega S.A.

The Company has a loan payable to Omega S.A. (“Omega”), a company owned by Arturo Bickford, one of the founding shareholders of Organto Guatemala, S.A., a subsidiary of the Company, in the amount of \$322,958 (US\$242,844), which accrues interest at 8.5% per annum and was due on October 31, 2016. During 2015, Omega advanced an additional \$65,453 (Guatemalan Quetzals (“Q”) Q400,050), with an interest rate of 42% per annum, and another \$38,329 (US\$28,821), interest free. The Company is currently restructuring amounts due to Omega.

The tables below summarize amounts owing to Omega:

	March 31, 2017	December 31, 2016
	(\$)	(\$)
Loan from Omega (US\$242,844), 8.5% interest	322,958	326,067
Advance from Omega (Q400,050) for working capital, 42% interest	62,680	63,973
Advance from Omega (US\$28,821), interest free	38,329	38,698
Interest payable to Omega	85,012	71,681
	508,979	500,419

A continuity of the balances is shown below:

	(\$)
Balance at January 1, 2016	451,825
Partial payment of interest	(8,752)
Interest expense	71,681
Foreign exchange	(14,335)
Balance at December 31, 2016	500,419
Interest expense	13,331
Foreign exchange	(4,771)
Balance at March 31, 2017	508,979

8. Short-term loans payable

On July 19, 2016, the Company restructured previous loans (the “Original CrediPresto Loans”) from CrediPresto SAPI de C.V., SOFOM, E.N.R. (“CrediPresto”), the principal of which is Javier Reyes, a director of the Company, into a new loan (the “New CrediPresto Loan”) with a principal of \$121,593 (US\$91,430), which is now due on June 30, 2017, accruing interest at 18% per annum.

On September 23, 2016, the Company received two bridge loans totalling \$131,170 (US\$100,000) bearing interest of 6% per annum. The loans included 300,000 share purchase warrants for the purchase of 300,000 shares exercisable at \$0.30 per share until October 24, 2017 (note 10c). The Company determined the fair value of the loans to be \$114,129 (US\$85,000) and the residual value of \$20,200 (US\$15,000) has been allocated to the value of the warrants. During the three months ended March 31, 2017, the Company recorded accretion of \$4,987 (2016 - \$nil) on these loans. In April 2017, in connection with receiving new bridge loans totaling an additional \$265,980 (US\$200,000), the terms of the bridge loans have been amended to an interest rate of 8% per annum, and are payable one year from the date of the loan agreements, subject to the option of the lenders to demand early repayment under certain conditions (note 16). A total of 1,000,000 non-transferrable warrants will be issued to the lenders, exercisable for a term of one year from the date of the loan agreements, at \$0.20 per share. The original 300,000 warrants will be cancelled.

During 2016, Peter Gianulis, a director and officer of the Company, provided the Company with interest free loans totaling \$64,496, due on demand. The loans from Peter Gianulis have been repaid during 2017.

	March 31, 2017 (\$)	December 31, 2016 (\$)
Loan from CrediPresto (note 13)	108,294	109,337
Interest payable to CrediPresto (note 13)	13,756	9,102
Bridge loans	113,042	114,129
Interest and accretion on bridge loans	12,917	5,494
Loans from Peter Gianulis (note 13)	-	64,496
	248,009	302,558

8. Short-term loans payable - continued

A continuity of the balances is shown below:

	(\$)
Balance at January 1, 2016	114,657
Interest payment on the Original CrediPresto Loans (US\$3,450)	(4,735)
Repayment of principal on the Original CrediPresto Loans (US\$30,050)	(40,373)
Original CrediPresto Loans (US\$18,000)	24,703
Loan from Peter Gianulis	64,496
Interest expense	26,457
Fair value of bridge loans (US\$85,000)	114,129
Foreign exchange	3,224
Balance at December 31, 2016	302,558
Repayment of loan to Peter Gianulis	(64,496)
Interest and accretion expense	12,419
Foreign exchange	(2,472)
Balance at March 31, 2017	248,009

9. Convertible loan payable

On March 30, 2016, the Company entered into a secured convertible promissory note with SG Strategic Income Limited (“SGSI”) pursuant to which SGSI has agreed to lend the Company \$784,641 (US\$590,000) until March 30, 2017. Outstanding amounts incur interest at a rate of 5% annually and are secured by a first charge on the Company’s assets in Guatemala. SGSI had advanced to the Company \$757,458 (US\$558,000) during fiscal 2015, prior to finalizing the terms of the loan. Upon finalization of the terms of the loan, outstanding interest to March 30, 2016 of \$16,846 (US\$12,275) was repaid and the remaining balance of the promissory note was received \$41,078 (US\$32,000). The Company is currently restructuring this loan with SGSI and intends to extend the loan by an additional year.

The loan and any interest accrued to date thereon will convert into common shares of the Company (i) at SGSI’s election on delivering written notice to the Company; or (ii) automatically, if the Company completes a financing of at least \$5 million, including the value of the SGSI’s convertible note and any other debt convertible into equity securities of the Company as a result of such financing. Any conversion will be effected based on a price of \$0.42 per share and conversion shares will be issued on the same terms and conditions that are applicable to the securities issued under the financing.

Upon finalizing the terms of the loan on March 30, 2016, the Company recorded the fair value of the conversion option of \$127,347 (US\$98,057) as an embedded derivative financial liability as a result of the instrument being denominated in US dollars with the residual amount allocated to the debt component. The embedded derivative liability is subject to revaluation at each balance sheet date with the change in fair value recorded in the Statement of Loss. The debt component will be accreted to the face value of the loan over the one year term using the effective interest rate method.

9. Convertible loan payable - continued

The tables below summarizes amounts owing to SGSI.

	March 31, 2017 (\$)	December 31, 2016 (\$)
Loan from SGSI	784,641	757,050
Interest payable to SGSI	39,340	30,060
	823,981	787,110

A continuity of the balance is shown below:

	(\$)
Balance at January 1, 2016	764,087
Reclassified to embedded derivative liability	(135,869)
Additional loan from SGSI	41,078
Accretion expense	102,793
Interest paid (US\$12,275)	(16,846)
Interest expense	39,389
Foreign exchange	(7,522)
Balance at December 31, 2016	787,110
Accretion expense	34,363
Interest expense	9,674
Foreign exchange	(7,166)
Balance at March 31, 2017	823,981

A continuity of the embedded derivative financial liability is shown below:

	(\$)
January 1, 2016	-
Recognition of embedded derivative financial liability on SGSI promissory note	127,347
Fair value of conversion option of additional loan received	8,522

Balance at December 31, 2016	69,361
Expiry of conversion option	(69,361)
Balance at March 31, 2017	-

10. Share capital**(a) Common shares**

Authorized – unlimited common shares without par value.

At March 31, 2017, the Company had 76,816,187 (December 31, 2016 – 76,771,801) common shares issued and outstanding.

During the three months ended March 31, 2017, the Company issued 44,386 common shares with a value of \$10,000 as compensation for consulting services. Such shares were issued at prices corresponding to the month in which the services were provided based on the 20 day volume weighted average closing price of the common shares of the Company.

On July 27, 2016, the Company closed the first tranche of its non-brokered private placement. Gross proceeds of \$552,043 were raised from the sale at \$0.30 per share for a total of 1,840,143 common shares. The Company paid a finder's fee of \$18,159 and issued finder's warrants for the purchase of up to 60,530 shares exercisable at \$0.30 per share until January 28, 2018. The warrants had a fair value of \$9,788.

On November 1, 2016, the Company completed the second and final tranche of its non-brokered private placement through the issuance of 2,219,917 common shares at \$0.30 per share for gross proceeds of \$665,976. The Company also paid a finder's fee of \$31,558 and issued finder's warrants for the purchase of up to 20,250 shares exercisable at \$0.35 per share until November 2, 2017 and 64,695 shares exercisable at \$0.30 per share until May 2, 2018. The warrants had a fair value of \$8,564.

During the year ended December 31, 2016, the Company issued 72,810 common shares with a fair value of \$20,000 as compensation for consulting services. Such shares were issued at prices corresponding to the month in which the services were provided based on the 20 day volume weighted average closing price of the common shares of the Company.

(b) Share options

The Company has adopted a rolling stock option plan whereby the Board of Directors, may from time to time, grant options to directors, officers, employees or non-employee service providers to a maximum of 10% of the outstanding common shares of the Company at any point in time, less any share options already reserved for issuance under share options granted under previous stock option plans of the Company or granted under any other employee incentive purchase plan that the Company may adopt. Options granted must be exercised no later than ten years from date of grant or such lesser period as determined by the Company's Board of Directors.

10. Share capital - continued

The continuity of the Company's share options is as follows:

	Number of options	Weighted average exercise price (\$)
Balance, January 1, 2016	4,800,000	0.20
Granted	25,000	0.30
Exercised	(30,000)	0.065
Forfeited	(1,775,000)	0.20
Cancelled	(600,000)	0.20
Balance, December 31, 2016 and March 31, 2017	2,420,000	0.20

A summary of the Company's share options at March 31, 2017 is as follows:

Exercise price (\$)	Options outstanding		Options exercisable	
	Number of options outstanding	Weighted average remaining contractual life (years)	Number of options exercisable	Weighted average remaining contractual life (years)
0.065	35,000	1.72	35,000	1.72
0.15	35,000	2.61	35,000	2.61
0.20	2,350,000	3.67	2,350,000	3.67
0.065-0.20	2,420,000	3.63	2,420,000	3.63

25,000 share options were granted during the year ended December 31, 2016, where 6,250 share options vests every three months. The assumptions used in the Black-Scholes Option Pricing model were as follows: expected price volatility of 109%, risk free interest rate of 0.55%, expected life of options of 1 year, and no dividend yield. The fair value of these options granted was \$0.16, resulting in a total fair value of \$4,043.

The fair value of each share option is estimated on the date of grant using the Black-Scholes Option Pricing Model that uses the assumptions noted in the table above. Expected volatilities are based on historical volatility of the Company's shares, and other factors. The expected term of share options granted represents the period of time that share options granted are expected to be outstanding. The risk-free rate of periods within the contractual life of the share option is based on the Canadian government bond rate.

During the year ended December 31, 2016, 1,775,000 share options were forfeited, of which, 1,750,000 were voluntarily forfeited by two officers of the Company.

During the year ended December 31, 2016, 600,000 share options were cancelled as per an agreement between the Company and a former director and officer of the Company.

(c) Warrants

On September 1, 2016 and November 1, 2016, the Company granted warrants to third parties as finders' fees, in connection with private placements of the Company's common shares. The warrants have a total fair value of \$18,352.

10. Share capital - continued

On October 24, 2016, the Company granted 300,000 warrants in connection with loans payable with a fair value of \$20,200 (note 8 and 16).

Warrants are exercisable as follows:

Grant date	Number of warrants	Exercise Price (\$)	Expiration Date	Fair value per warrant (\$)	Total fair value (\$)
September 1, 2016	60,530	0.30	January 28, 2018	0.1617	9,788
October 24, 2016	300,000	0.30	October 24, 2017	0.0673	20,200
November 1, 2016	20,250	0.35	November 2, 2017	0.0924	1,871
November 1, 2016	64,695	0.30	May 2, 2018	0.1035	6,693
	445,475				38,552

The fair value of each finder's warrant is estimated on the date of grant using the Black-Scholes Option Pricing Model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatility of the Company's shares, and other factors. The expected term of warrants granted represents the period of time that warrants granted are expected to be outstanding. The risk-free rate of periods within the contractual life of the warrants is based on the Canadian government bond rate.

Grant date	Expected price volatility	Risk free interest rate	Expected life of warrants	Expected dividend yield
September 1, 2016	109%	0.55%	1 year	nil
November 1, 2016	115%	0.54%	1 year	nil

The continuity of the Company's warrants is as follows:

	Number of warrants	Weighted average exercise price (\$)
Balance, January 1, 2016	-	-
Granted	445,475	0.30
Balance, December 31, 2016 and March 31, 2017	445,475	0.30

10. Share capital - continued

(d) Loss per share

16. Subsequent events
Bridge loan

The Company received new bridge loans totalling \$265,980 (US\$200,000) in April 2017. The loans are unsecured, bear interest at a rate of 8% per annum and have a one year repayment term, subject to the option of the lenders to demand early repayment any time after Organto has announced the completion of an equity financing for aggregate proceeds of at least \$1,342,700 (US\$1,000,000). An aggregate of 1,000,000 non-transferable warrants will be issued to the lenders, exercisable for a term of one year from the date of the loan agreements, at \$0.20 per share. The new bridge loan agreements are subject to the approval of the TSX-V.

Private placement

On May 11, 2017, the Company announced its intention to complete a non-brokered private placement of 23,000,000 units at a price of \$0.15 per unit for gross proceeds of up to \$3,450,000. Each unit will consist of one common share and one warrant exercisable to purchase one additional common share at a price of \$0.25 for a period of 24 months after the closing date. The exercise date of the warrants will be subject to acceleration in the event that the volume-weighted average closing price of the Company's common shares on the TSXV, or such other stock exchange on which the Company's common shares are primarily traded from time to time, is greater than or equal to \$0.35 per share for a period of 10 consecutive trading days (an "Acceleration Event") and such Acceleration Event occurs any time after the expiration of a four month hold period.

Subject to the approval of the TSXV, Organto may pay to eligible finders cash finders' fees equal to 8% of the gross proceeds raised and issue finders' warrants equal to 8% of the number of units issued to applicable subscribers under the private placement. Each finder's warrant will be exercisable into one Organto common shares at a price of \$0.15 for a period of 24 months from the closing date.

Share issuance

On May 16, 2017, the Company issued 250,000 common shares to a supplier to settle amounts owing of \$62,500.
